Kährs receives ‘Engineered Wood Supplier of the Year’ Award

Kährs has been awarded ‘Engineered Wood Supplier of the Year 2007’ in the Editor’s Choice category of the Contract Floors Award. The industry award, which Kährs received for the third time, was presented at a prestigious ceremony hosted at Wembley Stadium.

Kährs range of wood flooring has grown dramatically in recent years. Ongoing investment in product development has resulted in the launch of numerous products, including Kährs new Heritage, Linnea TEN and Activity floor ranges. Many new product launches are anticipated for 2008, with a continued emphasis on design finishes. Meanwhile, Kährs UK is working to further improve its customer service, with a focus on logistics and internal systems, and the introduction of a new Specification Team.

Harvey Booth, Acting General Manager commented, “We’re delighted to have achieved this Award, which marks a new, exciting chapter at Kährs. We have a great team in place, many of whom are taking on new roles to enhance the smooth running of our UK operation, and we’re looking forward to introducing some very exciting product innovations throughout next year.”
