

KOMI CLW 218

The Kährs Luxury Tiles Click floors has been designed for home and public environments that require floors with adhesive-free installation that are both beautiful and tough. They come in a variety of wood and stone designs. Maximum durability and stability is achieved through the rigid core and the unique 5G locking technology, enabling easy installation by clicking the tiles together. The Click floors are made from virgin vinyl with a rigid core. All floors in the collection have IXPE sound reducing backing, effectively controlling noise. The surface is treated with a strong ceramic coating resistant to wear and tear, scratching and water. They can be installed on an existing floor, making the Click floors ideal to use in renovation projects or when you want to retain the existing floor. Just like all our other Luxury Tiles floors, they are phthalate-free.
