Floors beyond expectations

ENGINEERED WOOD PRICE GUIDE 2025

KAHRS DESIGN & INSPIRATION GUIDE

From our factory to your home

The homes we live in are never just bricks and mortar or glass and steel; they also represent chapters of our lives and places of sanctuary. Within this inspiration and design guide you will find floors that can transform the way a home looks, feels and is lived in. Floors that go beyond your expectations.

www.kahrs.com

Swedish heritage

Historically, Swedes have been used to centuries of scarcity and rough climate. By necessity, we've been resourceful by nature and it's here our tradition of refinement is to be found. We've lived close to, in and by natural resources for centuries and we've learnt how to make them valuable.

By taking care of them, they have taken care of us. The ability to make a lot from a little is the key reason for Sweden's growth as an industrial force. With an innovative mindset, a sustainable approach and dedicated work we are used to maximising potentials – in both nature and each other.

The same goes for Kährs as a brand. It's in our DNA. It's our heritage. It's our future. And it's how we not only live up to the expectations.

But go beyond them.

A PROUD HISTORY SINCE 1857

Kährs have a proud history working with wood production dating back to 1857.

In 1941 we registered the first patent for what is known as engineered wooden floors, a groundbreaking innovation at that time.

Fast forward to today, and our factory remains at the same location as 1857. And we have grown to become one of Europe's largest producers of engineered wooden

floors for homes and commercial buildings, where we continue to lead the market on key areas of quality, design, sustainability and innovation.

For almost 100 years, generations of families and project clients have trusted us to supply quality flooring products to make a house a home, and to last a generation. That makes us proud.

A lifestyle choice for your home

Our design roots are Scandinavian, but we are also in step with which lifestyle choices are being made in the UK.

The Kährs meaning of Scandinavian Design is more than just superficial. It's deeply rooted in functionality and purpose. It manifests something simple, yet strong enough to withstand any challenge put on it.

Modern, yet timeless enough to outlive trends. Minimalist, yet welcoming enough to express a pleasant invitation to whomever may be the guest.

It is a celebration of non compromising quality – wherever it is to be found. The phrase – just like our floors – is something that comes with many expectations.

Expectations we have to go beyond.

What we offer as standard that other brands don't

To design and produce a wooden floor to not only look beautiful and to last for generations it needs to be produced in a certain way.

We also believe wooden floors should come in long length planks as standard, and not in nested or random lengths. We know it would be cheaper to produce our products in nested or random lengths, but we believe it would affect the overall design and performance of the floor.

We believe that wooden floors should have a patented locking joint such as our Woodloc 5s, suitable to be a floating floor or be fully bonded by professional installers who can guarantee a gap free floor. We know it would be cheaper to work with a T&G joint system, but we feel this offers inferior quality especially when installing as a floating floor.

At Kahrs you can be re-assured we only work with long lengths and patented locking joints, and we don't look to charge more for what we believe should be standard as other brands do.

Below you will see some of the Plank sizes we offer as standard:

5 PLANK LENGTH SIZES

XXL: 2400mm, XL: 2200mm, L: 2000mm, M: 1900mm or S: 1200mm

Proven quality

Quality is easy to promise, but only time can truly validate that promise. Lasting quality isn't measured in days or months, but in years and decades. With a heritage spanning 170 years, Kährs has consistently upheld our commitment to quality.

It's not just a claim for us – it's a legacy we've kept cultivating. It's a circular force of quality. Every floor we produce reflects this dedication. Crafted with precision and care, our floors embody this pursuit. But the floors are merely the end result of something else – an attitude. An attitude that stipulates quality in all the steps of the process – internally and externally: purchase, production, sales and customer service.

No matter where, we provide an experience that withstands the test of time, not just for today, but for tomorrow and all the days beyond. As market leaders it's something that's expected from us. If we want to keep that position it's our responsibility to not just meet these expectations. But to go beyond them.

Our warranty and promise to you

We don't work with any gimmicks around our warranties, such as offers of 100 year guarantees or lifetime warranties that last for only 10 years. You can see below we offer simple transparent warranties around all our wooden floors and our promise to you is that they are genuine.

All our wooden flooring products apart from a few species such as Beech and Maple are suitable for any type of under floor heating system which is covered within your warranty.

Beside each product in this guide, you will be able to reference the warranty period and depending on the floor construction we offer:

30 Year warranties

20 Year warranties

15 Year warranties

Visit our website and find out more on our warranties and how to register them with an approved Kährs dealer.

Environmental responsibility

Kährs leading the way on flooring sustainability

We feel that not only is it important for sustainability to be one of the main pillars of our business, but that we also have an environmental responsibility. Choosing a Kährs wood floor is a smart and green choice for the environment, both indoors and for our planet.

Kährs are one of the world's oldest and most innovative manufacturers of wood floors. Our innovations have radically transformed the global wood flooring industry and contributed towards sustainable development. We are always trying to find ways to make our production process more environmentally friendly.

Through the use of wood and supporting reforestation; and environmentally conscious production, we do our best to continually drive sustainable development in the flooring industry.

Find out more on how we lead the flooring industry on offering transparency on our environmental responsibilities, download our environmental certifications and learn more about what sustainability means to us at Kährs.

Trend insights 2025

Kährs' 2025 trend predictions highlight a shift toward colours that evoke tranquility and nature, with soft neutrals – bringing the outdoors in. Sulky blues and amber accents that offers energy and boldness, making them perfect for creating versatile and personalized spaces. Transformative pastels, blending blue, purple, and dusty pink, to reflect an eco-conscious mindset. And lastly, terracotta tones will bring warmth and connection to nature, perfectly complementing Kährs' classic oak design flooring.

CHAPTERS OF CHANGE

As we write the next chapter of flooring design in 2025, Circularity takes centre stage. Eco-Friendly Materials: Recycled, renewable, and locally sourced materials will become the norm. Floors made from sustainable sources and innovative materials that minimize carbon footprint will be in high demand.

AUTHORING SPACES

At the heart of this trend is the power of Pattern-Play. While minimalism will remain popular, there will also be a rise in patterned floors such as herringbone. Classic patterns give interiors a sense of dynamic movement while maintaining a timeless appeal.

NARRATIVE OF NATURE

This trend embraces Nature-Inspired Aesthetics; organic materials, natural textures, and earthy tones. To create a seamless connection with the environment. Each floor tells a unique story – crafted through traditional methods and enriched by modern advancements. Whether it's the texture of raw wood or subtle hues that evoke nature's palette, these floors create spaces that feel grounded, timeless, and full of character with Texture as a Statement.

ETERNAL ICONS

This insight delves into the fusion of classic design principles with a modern twist, infusing spaces with elegance that withstands the test of time. With timeless and natural elements refreshed for modern spaces, Kährs ensures that our floors stand as enduring icons of design – beautiful today and tomorrow.

Kährs ensures that our floors stand as enduring icons of design – beautiful today and tomorrow.

How to choose your perfect floor

Our best advice when it comes to choosing a wood floor? Go with your heart. However, there are some important aspects to consider in the selection process, and to help, we have compiled a short checklist to guide you. The best thing to do is to visit one of our approved retailers, as nothing beats seeing and feeling our floors to get a true grasp of their design features.

☀ SATIN LACQUER

Our satin lacquer complements the wood's character by accentuating its natural structure. It also makes the floor more hardwearing and easier to clean. Our lacquer is one of the thinnest on the market and does not conceal the natural lustre of the wood.

● MATT LACQUER

The subtleness of our matt lacquer produces a bare wood look, as if the floor was left untreated, or treated with oil. The soft, natural surface is pleasant to walk barefoot on. Matt lacquer is as hardwearing and easy to maintain as our satin lacquer. A matt surface is more textured than a satin surface.

○ ULTRA MATT LACQUER

Wood treated with our ultra-matt lacquer feels and looks as if it was made from untreated newly sawn timber, but with a strong invisible shield against wear and tear. The ultra-matt surface is more textured than a matt surface.

🌿 OIL

Kährs oil gives your floor a natural and beautiful look. Oil brings out the fine structure and grain of the wood and enhances its natural colour. Please note that floors should be oiled immediately after installation and then regularly maintained with Kährs Satin Oil.

DESIGN FOR ALL SENSES

The impression of the floor is made up of what you see, as well as what you feel. Many of our floor designs include surfaces that have been handscraped and/or brushed to create a unique patina that speaks to several of your senses. The look can be further enhanced by planks with bevelled edges.

BRUSHING

Brushing the surface highlights the natural structure of the grain, and emphasizes the texture of the wood. Brushing effects vary, depending on the wood species.

STAINING

Staining further enhances the wood's natural colour tones. It also allows us to apply new colours, thus completely transforming the appearance of the wood. Kährs offers a wide range of stained options – from the palest white to rich charcoal shades.

SMOKED

This special process alters the colour and shade of each plank. There are two grades of smoked finish: a lightly smoked treatment and the darker, more dramatic, fully smoked treatment.

BEVELLING

A bevelled edge feature on a 1-strip floor gives a very distinct look, highlighting the shape of the plank. From microbeveling – a discreet reinforcement of the edges – to a more prominent bevelling on both the long and the short sides.

HANDSCRAPING

By using different tools for manual wood scraping and sanding, we can give a new wood floor a worn appearance. A great amount of handcraft goes into each floor to achieve its rustic character.

CONSIDER THE SETTING

When installing a new floor, there are several features of the room that are important to consider. Installing your floor lengthwise will accentuate the shape of the room. Meanwhile, light floors coupled with light walls will enhance the sense of space, while a dark floor will ground the room. Dark floors combined with dark walls diminish the room – but can bring warmth and cosiness.

INSTALL IN THE DIRECTION OF THE LIGHT

What type of light is there in the room? The size of the windows, the amount of natural light, artificial lighting sources, and the direction of the light all affect the perception of the floor. The general rule is to install the floor lengthwise towards the window. If the room is long and narrow with windows placed lengthwise, you will have to choose what you feel is more important to accentuate – the shape or light.

WHAT MAKES THE GRADE – CLEAN OR RUSTIC?

Clean, calm and elegant – or rustic, rich in patina, knots and cracks? Kährs offers a selection of different gradings, each with a unique character. Grading depends on which part of the log is used when producing individual boards.

SEVEDE

DUBLIN

PRIME/CALM

These prime grade floors are produced from our cleanest boards, featuring a uniform appearance with small variations in grain. They may contain small knots.

VERONA

SELECT/VARIATION

The floors with this grading are characterized by subtle variations in colour, tone and pattern. They may contain small knots.

BURGUNDY

CLASSIC/LIVELY

The most popular grades within flooring shows the natural variation of timber, you won't find as many larger knots as you would in our rustic grade but it offers the traditional design of a wooden floor.

STRAW

CHARACTER/DYNAMIC

These floors are made from boards with knots and cracks that give them simultaneously a lively and dramatic, yet warm character. They feature a variety of colour tones. Occasional sapwood.

FINNVEDEN

RUSTIC/EXPRESSIVE

If you want your floor to make a strong impression, choose an Expressive floor. These are made from boards with dramatic cracks and powerful knots and with a wide variety of colour tones. Occasional sapwood.

EGGSHELL

WHAT IS SAP WOOD?

The sap wood comes from the outer part of the log and is often in a lighter hue than the inner parts. It's a natural variation in the wood and a natural part of most of our wood floors.

SIZE MATTERS

The sense of space in a room is affected by the width, length and pattern design of the floor. We offer several widths of floors including super wide boards and we only work with long length planks to give you a superior design. Have fun using our digital room planner to see how our floor options look in your home.

DESIGN OPTIONS

1-STRIP PLANK

The surface layer of every plank floor board is sawn from a single piece of wood. The natural appearance of the wood, including knots, colour variations and grain, is reflected in this. However, for some of our plank floor collections, we have selected wood that offers little variation in colour and a minimum of knots. Kährs plank flooring is available in several different lengths and widths.

HERRINGBONE

The attractive and time-less design of the Herringbone pattern is created by rectangular boards which are laid in an attractive zig-zag pattern, stacked on-top of each other to create a "point" giving a characteristic expression to a room.

DUTCH PATTERN

Based on a classic Dutch design, our "Palazzo" wood flooring boards are arranged in a multi-strip formation, following a box repeat pattern. They have a unique repeating pattern with three short pieces running lengthwise separated by a perpendicular piece. The result is a vivid display of symmetry that brings any room to life.

CONSTRUCTION OPTIONS

ENGINEERED FLOORING

Our engineered floors consist of a surface layer, core layer and backing. The core material is made from pine/spruce lamella. The total thickness of the floor is at least 13 mm. The surface layer can be re-sanded 3-4 times. Our 3-layer floors can be both installed floating on a level, solid surface such as concrete, particleboard or wood with suitable underlayer material, or with glued down installation. They are quickly and easily installed with the glueless Woodloc® system and are suitable for areas with moderate and heavy traffic.

2-LAYER FLOORING

The 2-layer floors consist of a surface layer and backing. The core material is made from pine/spruce lamella. The total thickness of the floor is 11mm. The surface layer can be re-sanded 2 times. Our 2-layer floors are installed glued down with full surface bonding. They are suitable for areas with light to moderate traffic.

VENEER FLOORING

Our veneer flooring consists of three layers; surface, core and backing. The core is made from HDF and the surface from real wood. The glueless Woodloc® joint installation system ensures fast and easy installation. Thanks to the thin construction, veneer floors are perfect for renovation since they go with existing thresholds and doors. We offer our Veneer flooring in a Prime or rustic grading, some also with brushing features.

Kährs floor planner – the ideal tool when choosing a floor

We developed a digital floor planner to help you choose the right, and best looking floor for your home. It allows you to quickly and easily upload an image of your interior, and then simply browse around our broad portfolio of floors and try them out until you find your favourite. This technology enables you to get a real impression of what the floor will look like in your home.

A floor can truly change the interior of any home, and it's one of the most important interior elements. Choosing a new floor is a big decision and there are many things to take into account. Will it make the room appear smaller or larger, darker or lighter? The appearance, feel and colour are only a few points to consider. We have therefore developed the Kährs Floor Planner: A great tool that will help to ensure that you choose the right floor.

Once you have narrowed down your favourite floors to two options, the compare function is perfect. By using the compare function, you can easily compare between two different floors by simply dragging the vertical line left/right.

The impact of colour

Light, dark or natural? The colour of the floor has a strong impact on how the room is perceived. A dark floor “swallows” a lot of light, but it also creates a sense of warmth and cosiness. A light wood floor reflects the light and adds space to the room.

WHITE FLOORS

Wood floors in shades of misty, cloudy white create an immediate sense of tranquillity in any interior. Our range includes floors featuring different designs, with different surface treatments; from oiled to lacquered.

GREY FLOORS

One of the latest trends in wood flooring is grey – from shades of driftwood to charcoal. Grey coloured floors are made to look like they have aged over the years, creating a unique and warm patina.

LIGHT FLOORS

Relaxed, yet refined, light wood floors create a perfect canvas for your furniture. They also add instant light to any interior. Our light floors come in a wide variety of shades, from floors with crisp, cool starkness, to warmer shades.

BROWN FLOORS

Nothing can create instant warmth quite like a brown wood floor. The rich, earthy tones of amber and tobacco create a perfect backdrop for both traditional and contemporary interiors.

NATURAL FLOORS

A true classic, a natural oak wood floor will add a sense of warmth and natural beauty to your home. Depending on the design, they can be lively or calm, rustic or elegant.

DARK FLOORS

Dark wood floors create a solid ground. They bring a sense of sophistication and richness to the interior.

Herringbone Collection

Premium herringbone designs

Choose from one of our modern large herringbone designs or a smaller traditional parquet size design. We have all the main colour tones covered including beautiful smoked Oak's. As we do with our plank products, we offer our herringbone designs in different grading options including Prime grading with no knots or lively and warm rustic gradings including some with a brushed surface feature. We also have matching frame planks to mirror our large herringbone designs.

White wood floors offer numerous advantages, making them a popular choice among homeowners and designers. They bring brightness and openness to any space. With a timeless appeal, they seamlessly blend with various design styles, serving as a versatile backdrop for furniture and decor experimentation. They are also easy to clean and maintain, maintaining their pristine appearance over the years.

Light floors

Premium planks and pattern designs

Relaxed yet refined light wood floors create a perfect canvas for showing off your furniture and the design features of your home. They also add instant light to any interior. Our light floors come in a wide variety of colours, from stark light shades to warm tones.

Try these floors

in your own home. Simply scan this code to open Kährs Floor Planner where you can upload a picture of your home and browse around our broad range of floors to see how a certain floor looks in your home.

A fun to know fact is that when wood is exposed to normal sunlight it is subject to colour changes. As with all natural products made from wood, these changes are expected and add to the beauty and distinctiveness of wood floors.

GINGER

Natural floors

Premium planks and pattern designs

A true classic: a natural wood floor will add a sense of warmth and natural beauty to your home. Depending on the design, they can be lively or calm, rustic or elegant. Our wide selection includes different board sizes, surface treatments, and shades from light and airy to rich and golden.

Brown floors

Premium planks and pattern designs

Nothing can create instant warmth quite like a brown wood floor. The rich, earthy tones of amber and coffee create a perfect backdrop for both traditional and contemporary interiors, providing an authentic aged look. Our brown floors come in a range of rich shades, various designs and surface treatments.

On some of our brown and dark floors we smoke our products to give a lovely depth to the colour. This is done through a process using tannins in a smoking chamber. One interesting fact is that smoked products can lighten over time when exposed to natural UV light.

Dark floors

Premium planks and pattern designs

Dark wood floors create a solid base. They bring a sense of sophistication and richness to the interior. They never seem to go out of fashion; they are always trendy and in style. The contrast between dark wood floors and bright, light walls for many people epitomizes a sophisticated and upmarket style. Our dark floors come in many designs and surface treatments.

For years, clever interior designers have been choosing our dark wood floors as it can help to hide dirt and dust better than lighter-colored floors, which can make them a good choice for high-traffic areas like entryways or hallways.

Clean Grade Collection

Premium planks and pattern designs

There is a clear trend towards choosing a calmer and cleaner grade of wood floor and at Kahrs we have several design options at different price ranges. We have highlighted our cleanest and calmest planks & pattern designs to help narrow down your choice. Within the following collection you will find wood flooring with no knots, or with very little knots that will be small.

Wide planks in focus

Some rooms deserve a wide plank design, and they can add something grand to a room.

We have several wide plank options in different colour tones and price points. Choose our widest plank measuring a majestic 305mm wide or choose a design from our 220mm wide plank options in the Tempest collection.

Narrow planks: 2-strip

As the inventors of engineered wood flooring, we are clever in how we can produce some of our floors to provide a narrow plank design at a mid-price point.

We place 2 strips of narrow planks onto a single board where the strips are selected in the same way when producing our full plank designs. We arrange every 2-strip floor to give them their own unique character. Kährs' 2-strip flooring is available in two options: long lengths, and short lengths.

The below collection features all our lovely 2-strip designs some featuring clean grades and brushed finishes, along with species such as Ash and Walnut.

Both the number of strips in a floorboard and the direction in which you lay it affects the room more than you think. A common way to lay wood floors is in the direction of a room's light source. If you have a wall with many windows, you should lay the floor with the length of the boards towards the windows. Want to create depth in a room? Lay the strips vertically to make the room seem "longer" than it actually is. If you want to make a narrow hallway appear bigger, lay strips horizontally.

Scandinavian design classics: 3-strip essentials

The most popular design of wood flooring in Scandinavia is what is known as '3-Strip'.

This design creates light and space in any room, due to the size of the strips placed onto a plank format.

Due to the clever manufacturing process we have developed over many years at Kahrs, it means the 3 strip designs are not only beautiful looking floors but are our most affordable designs. We feel it is *essential* to make real wood floors affordable.

On some of our 3 strip designs you will find the same options open to you that you will find on our premium plank designs, such as clean grades, brushing, smoking, distressing and up to 30-year warranties.

Choose from the following designs to select a floor that will bring light and space to your home whilst making a real wood floor with high design features more affordable.

Guide to completing your floor

Once you have chosen your Kahrs floor, you have a few final areas to consider ensuring you achieve a perfect installation.

FINAL CHECKLIST

SUBFLOOR: UNDERLAYS

Whatever subfloor type you have, we have an underlay to suit and guarantee a successful installation, especially over any under floor heating. You will be able to choose the most suitable underlay from our easy reference guide.

TRIMS AND MOULDINGS

Whatever Kahrs floor you choose you can be re-assured we have a matching colour trim. Our Trims are made from solid wood so complement the floor design. We even offer several types of stairnose trims, so you can install our floors in your staircase.

BASIC INSTALLATION TOOLS:

Unlike other suppliers Kahrs only work with locking joints to ensure a gap free floor, and we provide several basic tools to allow flooring professionals to install our floors in the correct fixing method.

CLEANING & MAINTENANCE

Wood floors require little cleaning or maintenance, but when they do, we have several options for you to clean or maintain your floor including spray cleaners, tinted oils and floor refresher.

REPAIRS:

Should you need to repair your floor, don't panic we have everything you need to do this easily with our clever repair kits.

TECHNICAL ADVICE:

All installation guidelines can be downloaded easily from our website covering areas such as installing over under floor heating and subfloor considerations.

The following pages will give you all the information you need to complete your floor.

Choosing the most suitable underlay

We believe all successful wood flooring installations begin with choosing the correct underlay. Kahrs offer several options all designed to be compatible for any subfloor, moisture, under floor heating, acoustic, thermal resistance and sustainability requirements.

Below is a simple guide to allow you to choose the most suitable underlay for each specific installation.

ECO FLEX SILENT:

As the name suggests It not only has excellent sustainability properties as it contains a minimum of 90% natural mineral materials, but it also reduces walking sound by 30% and reduces heating costs due to low TR of 0.01M2/KW. Use for high compressive strength, UFH, sound reduction, low thermal resistance, and Eco requirements.

ECO FLEX SILENT is FREE of plasticizers, formaldehyde and heavy metals, solvent free and does not contain any other ozone-depleting substances.

	Impact sound	●●●●○
	Compressive strength	●●●●●
	Leveling effect	●●●●○
	Walking comfort	●●●●○
	Underfloor heating	●●●●●
	Moisture management	●●●●●

TUPLEX:

This is by far our most popular underlay that features an integrated moisture barrier and 200mm overlap with glue tape. Based on AirFlow technology, Tuplex can level up to 1,85 mm in cases of uneven subfloors and is suitable for underfloor heating due to the buildup of a top layer with high vapor resistance, a permeable bottom layer and solid flexible polystyrene granules sandwiched in between.

The Airflow Technology – Ventilates and seals out moisture, prevents mold formation under the floor and Tuplex high compression strength secures that the ventilation works under load. Tuplex also comes in 2 x easy to handle size rolls: 16.5m2 or 33m2.

	Impact sound	●●●●○
	Compressive strength	●●○○○
	Leveling effect	●●●●○
	Walking comfort	●●●○○
	Underfloor heating	●●●●●
	Moisture management	●●●●○

ECO FIBER:

Is a sustainable circular product allowing for a more sustainable choice regarding underlayment. The strong sustainable properties of Kährs Eco Fiber include:

- 100% recycled content consisting of textile and paper;
- 100% recyclable;
- Reduces waste of energy through a high thermal conductivity of 0,016 m2 K/W, by efficiently transporting warmth from underfloor heating;
- Contributes to a pleasant interior environment by providing a good sound isolation of 16 Db;
- And in addition is affordable and fast to install

Kährs offers a complete flooring system where every detail – from the skirting to the wide range of installation and maintenance products – have been designed to enhance the beauty and strength of your floor.

THE PERFECT FINISH

The smallest things often make the biggest difference. This is true of a Kährs floor, where the highest level of skill and craftsmanship goes into every detail, including the skirting boards and different types of mouldings.

CARE AND MAINTENANCE

Kährs' Care and Maintenance range cover all you need for daily care, as well as regular maintenance of the floor. It also includes products which can be used to repair a damaged floor.

Flooring trims

Complete any Kährs floor with a full range of accessories, including mouldings, scotia, skirtings, and stairnosing.

MOULDINGS

To cover the expansion gap between rooms, doorways and more.

REDUCER MOULDING

For use between floors of different heights. Also known as a 'ramp'.

Suitable for: 7-15mm Floors
Available to match most floors, including Kährs Life.

Dimension & SRP+VAT:

SRP: 58 x 20 x 2400 mm (15mm floors)
Oak £37.68, Cherry £51.38, Maple £39.96, Jarrah £41.10, Walnut £45.67
SRP: 42 x 14 x 2400 mm (7-13mm floors)
Oak £37.68, Walnut £45.67

EDGE MOULDING

To frame an area, such as a fireplace. Also known as an 'L-Moulding'.

Suitable for: 7-15mm Floors
Available to match most floors.

Dimension & SRP+VAT:

SRP: 38 x 22 x 2400 mm (15mm floors)
Oak £37.68, Cherry £51.38, Maple £39.96, Jarrah £41.10, Walnut £45.67
SRP: 38 x 14 x 2400 mm (7-13mm floors)
Oak £37.68, Walnut £45.67

T-MOULDING

For use between floors of the same height.

Suitable for: 7-15mm Floors
Available to match most floors.

Dimension & SRP+VAT:

SRP: 58 x 17 x 2400 mm (15mm floors)
Oak £37.68, Cherry £51.38, Maple £39.96, Jarrah £41.10, Walnut £45.67
SRP: 58 x 14 x 2400 mm (7-13mm floors)
Oak £37.68, Walnut £45.57
SRP: 58 x 12 x 2400 mm (Kährs Life)
Oak £37.68, Walnut £45.57
SRP: 58 x 12 x 1000 mm
Oak £20.55
SRP: 58 x 17 x 1000 mm
Oak £20.55

SCOTIA & BEADING

Our scotia and beading options cover the expansion gap around the perimeter of the room.

NATURAL SCOTIA

To match a natural wood skirting board

Suitable for: All Floors

Dimensions: 25 x 25 x 2400 mm

Technical support

A Kahrs floor installed following our installation & maintenance guidelines will last for generations.

Kahrs are seen as the experts in how to offer guidance on how an engineered wooden floor should be installed and we provide everything that may be needed by your installer and for yourself on how to install and maintain your floor.

You can download all our installation and maintenance manuals from our website or contact us with any questions you have at sales@kahrs.com

CLEANING, MAINTENANCE, AND REPAIR ADVICE FOR OUR WOOD FLOORS

We offer full instructions on how to clean, maintain and repair our wood flooring products.

KAHRS INSTALLATION:

Full installation instructions on how to install our wood floors can be found online.

UNDER FLOOR HEATING ADVICE

UFH guidelines and installation advice details can be found online.

SAMPLE SERVICE – order up to 3 free samples today!

Kährs offers a free-of-charge sampling service, and we can ship them directly to you, we can send you a maximum of 3 samples.

Once you have checked-out you can expect to receive your samples within 3-4 working days.

NOUVEAU GRAY

BOOK A CONSULTATION

Would you like advice on our products?
We are happy to help!

Book an appointment for all wooden flooring, bio-floors, and vinyl floors. Just pay a visit to our website to book a consultation and guidance when choosing your new floor. All you have to do is fill out a contact form, and an appointment with a Kährs approved dealer in your vicinity will be arranged.

Contact our helpdesk:
Email: sales@kahrs.com
Telephone: 02392 453 045
