

## Maintenance guide

# **KÄHRS UPOFLOOR ESTRAD WALL**

Date: 05-2020

This document is universal instruction which can be used to create the cleaning program for the installed wall coverings. Cleaning program should be created by co-operation with cleaning experts paying attention to use, traffic and other conditions.

### **INITIAL CLEANING**

Wash mildly alkalic cleaning agent. Use towel, mop or suitable washing pad. After washing surface must be dried. Avoid abrasive equipment and cleaning agents.

### **ROUTINE MAINTENANCE**

Semi wet or wet wiping with neutral or mildly alkalic universal cleanser. Maintainers can also be used. For chalk stains lower pH cleanser may be used. These must be neutralized after use with alkalic cleanser.
